TECHNICAL SERVICE BULLETIN #156

To: All Qualified Service Organizations

From: Ken Horsfield

Date: August 6, 1997

Product: Narkomed 2C

Change: Software Version 1.30

Rationale: North American Dräger has released software version 1.30 for the NM2C. This new software incorporates many new features that the customer will notice and benefit from. Specific details pertaining to this software enhancement can be found on Product Bulletin #64.

Timing: This software is currently available via Lotus Notes. Downloading should be performed at the next scheduled service or PMS.

Completion Date: January 1, 1998

Procedure: **Machines currently at version 1.20**
Contact your Customer Service Representative to order the appropriate quantity of Narkomed 2C supplement packets. When a machine is updated this packet shall be placed in the rear of the Operators Instruction manual. To make the customer aware of upgrades made to their machines, a special sheet called "Technology Plus" will accompany the supplement. It should be attached to a highly visible location on the front of the machine. It will describe the highlights of the update. You should fold the sheet in half, place tape across the top, and tape it to the machine. The required software is available via Lotus Notes. Refer to Technical Service Bulletin #143 for decompression and downloading instructions.

Machines currently at versions earlier than 1.20
Contact your Customer Service Representative to order the appropriate quantity of Narkomed 2C Operators Instruction Manual inserts. When a machine is updated the pages of the existent manual shall be replaced with the updated manual. The required software is available via Lotus Notes, or the Service Bulletin Board. Refer to Technical Service Bulletin #143 for decompression and downloading instructions.
